

**Step 4:**

Insert both ends of Upper Loop Shaping Rod into both openings at top of Loop Pocket. Assemble Thinner Loop Shaping Rods and slide through Loop Pocket from bottom. Fit ends of Thinner Loop Shaping Rods into ends of Upper Loop Shaping Rod inside pocket. (diagram D) Insert end of each of the two sections of Lower Loop Shaping Rod into both lower openings of Loop Pocket, so that ferrule on one section of Lower Loop Shaping Rod faces non-ferruled end of other section outside of pocket. Insert ends of Lower Loop Shaping Rod sections inside of pocket onto ends of Thinner Loop Shaping Rods. Finally, fit facing ends of Lower Loop Shaping Rod sections together at ferrule, making sure completed rod passes through Loop with Lower Vertical Rods. (diagram E)

**Step 5:**

Make sure that Sail on both sides of kite pops through in back as shown in diagram F before flying.

**Step 6:**

Undo daisy chain on bridle and attach flying line to main tow loop. Your Yakko Warrior is now ready to fly!

**FLIGHT INSTRUCTIONS:**

- Tie flying line to Tow Loop.
- Have a friend stand about 75 ft. downwind from you and hold the kite with its head pointed towards the sky.
- As the wind catches the kite, signal your friend to release it while you bring in the line with long steady pulls.
- Slowly let out more line as the kite flies upward.

RECOMMENDED LINE: 150 LB TEST LINE

**OPTIMUM WIND CONDITIONS FOR YAKKO WARRIOR**

BEAUFORT SCALE	CALM	LIGHT AIR	LIGHT BREEZE	GENTLE BREEZE	MODERATE BREEZE	FRESH BREEZE	STRONG BREEZE																									
WIND [M.P.H.]	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	
		smoke rises vertically	Direction of wind shown by smoke, but not by wind vanes	Wind felt on face, leaves rustle, ordinary vane moves	Leaves and small twigs in constant motion; wind extends light flag	Raises dust and loose paper; small branches move	Small trees & leaves begin to sway; crested wavelets form on inland water	Large branches in motion; utility wire whistle; windows rattle
